---

## PROJECT

### Online Plant selling system

Developed an online platform allowing users to browse, add plants to cart, and place orders with user-friendly design and backend management.

- Key Technologies: HTML, CSS, PHP, MySQL
- Features: Implemented product browsing, cart functionality, and order placement with user account handling.
- Skills Gained: E-commerce web development, database connectivity, and user session management.

### Artisan Craft : Online Marketplace for Handmade Goods

Created an online marketplace focused on handmade products with features for browsing, cart, and order management

- Key Technologies: HTML, CSS, JavaScript, PHP, MySQL
- Features: Developed a product catalog with add-to-cart functionality and order tracking.
- Skills Gained: Full-stack development, JavaScript interactivity, marketplace logic, and UI/UX design.

### Pharmacy Management System

A desktop-based Java application for pharmacy operations such as inventory, billing, and customer management.

- Key Technologies: Java, JavaFX (or Swing), MySQL, JDBC
- Features: Managed product inventory, handled sales and billing, and maintained customer records efficiently.
- Skills Gained: Desktop application development, database interaction with JDBC, and GUI design in Java.

---

## LANGUAGES

- English
